Also, not every coin came from the market; geothermal mining reportedly added around 474 BTC over three years (small in energy terms, but still additive).

Cross-border payment is one of the important application scenarios of blockchain technology. The traditional cross-border payment process is complex, involving multiple intermediaries, with long settlement time and high fees. In contrast, cross-border payments based on blockchain technology can realize direct peer-to-peer transactions, greatly simplifying the process, shortening settlement time, and reducing costs. Currently, several countries and financial institutions have begun to try using blockchain technology for cross-border payments. With the continuous maturity of technology and the improvement of regulatory frameworks,

blockchain cross-border payments are expected to become the mainstream cross-border payment method in the future.

In its latest State of Crypto report, a16z highlighted the growing involvement of traditional financial giants such as BlackRock, Visa, Fidelity and JPMorgan Chase, alongside fintech companies like Stripe, PayPal and Robinhood, all of which are expanding their presence in the digital asset space.

The shift shows that while investors expect the market to remain contained, they are hedging against the risk of a sudden drop.

It marks the first major crypto move DraftKings has made since shuttering its nonfungible token marketplace in July 2024 and further cements Polymarket's dominance in the predictions market sector.

The film uses the human angle to frame a debate that was prevalent at the time. When an attacker takes money from a smart contract, relying on the contract's internal logic to obtain tokens outside of the creator's intention, is that wrong? Should the attacker be censured, legally or otherwise, or is this simply fair play?
