He said that we've previously had two cycles superimposed based upon the Bitcoin halving events every four years and the M2 global money supply.

"Easing US-China tariff tensions and a renewed debasement trade echoed in gold's strength are fueling fresh demand for digital assets," Liu noted.

Define invalidation: Know exactly where you're wrong, and size positions so a failed confirmation is a small loss, not a portfolio event.

However, the catastrophic losses of models like Gemini highlight the significant risks that make financial institutions wary. A primary concern is the "black box"

nature of these systems, where the reasoning behind a trade is often opaque and unexplainable. This lack of transparency is a major hurdle for regulatory compliance and risk management, as establishing trust in a model's decisions is a critical and ongoing effort.

The FCA categorizes financial instruments in one of three risk buckets, starting with Readily Realizable Securities (RRS), including publicly traded companies, which the regulator says carry the least risk and feature no marketing restrictions.

Here's how Mt. Gox's Bitcoin movements have moved markets throughout its bankruptcy and civil rehabilitation proceedings.
