How to read: These patterns show two failed attempts to break resistance (top) or support (bottom). Confirmation occurs when the price crosses the neckline: bearish for double tops and bullish for double bottoms. Measure the height from the neckline to the peaks or troughs, then project it from the breakout point to estimate the move.

Researchers at tech giant Google said they mapped out the structure of a molecule 13,000 times faster than the most powerful “supercomputers” available today, achieving the first verifiable quantum advantage.

“For this year’s analysis, we’ve reorganized our regional classifications to better reflect both current crypto activity and geopolitical realities,” Chainalysis said.

Published Thursday, the report combines analyses of regions previously examined separately, covering Central, Northern, and Western Europe, as well as Eastern Europe as a whole.

Lee told CNBC after the trading day on Friday that investors were still “licking their wounds” from the record leverage flush, but there was also a bit of “gold envy” as the commodity has been a “huge performer this year.”
