A 2022 class-action lawsuit against Musk accused him of manipulating the price of DOGE through media appearances and social media posts.

This allows users to lock Bitcoin and bridge it to Ethereum without relying on a federated custodian or bridge. On the Ethereum side, a smart contract verifies the BTC vault via a Bitcoin light client before accounting for collateral.

The shift shows that while investors expect the market to remain contained, they are hedging against the risk of a sudden drop.

With Grok 4, you can automate the first round of filtering — for example, summarizing white papers, spotting tokenomics red flags and checking liquidity. By the time you get to manual research, you are already down to the 10% of projects that actually deserve your attention.

It also means there is more mining activity on the network as miners expand their operations and use more machines—and power—to continue minting coins.

In other words, the slight price bump is not being driven by aggressive buying. Instead, the move coincides with more passive buying.
