With Grok 4, you can automate the first round of filtering — for example, summarizing white papers, spotting tokenomics red flags and checking liquidity. By the time you get to manual research, you are already down to the 10% of projects that actually deserve your attention.

Unlike Bitcoin's proof-of-work (PoW) model, which relies on energy-intensive mining, PoS systems operate differently. They depend on staked capital and validator performance rather than computing power. This design makes them far more energy-efficient and accessible to a wider range of participants.
