Bitcoin mining company stocks rocketed up Monday as Bitcoin and other cryptocurrencies rallied amid increased optimism that the U.S. and China would find at least a partial resolution to its trade war.

The pivot comes a day after CEA Industries Inc., a Canadian vape company, announced it had acquired 500,000 BNB tokens at an average price about \$870 per token.

CEA, which announced its pivot to a BNB treasury company in July, is currently the largest BNB treasury company, and claims a goal of owning 1% of the total supply by the end of the year.

Shareholders welcomed the strategic expansion, as CleanSpark's stock price rose over 13% on Monday, after rising 140% year-to-date in 2025, according to data from Google Finance.

A key technical signal to watch is the 200-day exponential moving average (EMAs), which BTC has held for nearly six months. In the previous cycle, it maintained this trend from October 2024 to March 2024 before briefly losing it during consolidation. This time, the trendline has held from April to October 2025, with the price possibly losing the trendline in the coming days.
