If approved, the proposal will proceed through the Aave Request for Comment (ARFC) stage for community feedback, followed by a Snapshot vote and final onchain governance confirmation. Unlike short-term market interventions, the proposal aims to institutionalize buybacks as a recurring mechanism, essentially making the DAO an active capital allocator.

Google's newly released AI-powered search results are garnering lots of attention—for the wrong reasons. After the tech behemoth announced a host of new AI-powered tools last week as part of a new “Gemini Era,” its trademark web search results changed significantly, with natural language answers to questions

displayed above websites. "In the past year, we've answered billions of queries as part of the search-generated experience," Google CEO Sundar Pichai told the audience. "People are using it...

But despite the optimism around BNB, the world's largest crypto exchange by trading volume has faced backlash from users in recent weeks over its performance during the market crash.

The Bitcoin-buying firm's latest acquisition was funded with proceeds from preferred shares, leaving the Tysons Corner, Virginia-based firm with a stockpile of roughly 640,400 Bitcoin, which was recently worth \$71 billion, based on current prices, according to CoinGecko.

"In practical terms, this means HIVE is scaling production of Bitcoin much like a growth business scales output of a core product," he wrote. "Each incremental exahash increases daily production and revenue potential, while our HPC division provides a complementary revenue stream that grows with demand for compute power. "

Investors sank about \$477 million and \$142 million into the Bitcoin and Ethereum funds, respectively, last week, according to U.K. asset manager Farside Investors.
