“We need VCs for now because they represent a comfortable bridge for the world's capital to flow into our ecosystem,” wrote Lubin, adding:

The wallet movement marks SpaceX's second transfer in three months after the aerospace company moved \$153 million worth of Bitcoin in July, its first fund movement since 2022.

At the network level, institutional staking could enhance security and protocol stability. However, it may spark concerns about centralization if large funds dominate validator roles. This could affect yields and governance balance. Grayscale's staking-enabled ETPs will shape upcoming funds, influencing standards for transparency, risk disclosures, taxation and investor safeguards.

In a permissionless chain, the risks are technical and market-driven. In a corporate chain, the risks are regulatory and business-model-driven. Tempo might not rug you technically, but it could kill your yield with a policy update.
