## Comprehensive Guide to binance ach outage

The crypto market is riding high as “Uptober” delivers on its historical promise. Bitcoin hovers near a new all-time high, Ethereum pushes toward \$4,500, and altcoins are catching fire.

This happened as the “fear” sentiment gripped markets, with nearly \$230 billion in value erased in a single day.

The bill increases the Currency Transaction Report (CTR) threshold to \$30,000 from \$10,000 and the Suspicious Activity Report (SAR) thresholds from \$2,000 to \$3,000 and \$5,000 to \$10,000, while requiring the Treasury Department to adjust these amounts every five years to account for inflation.

How to read: A rising wedge in an uptrend often signals a potential reversal as momentum weakens, while a falling wedge in a downtrend points to a possible bullish reversal. These patterns can also act as continuation signals when aligned with the prevailing trend. Measure the wedge's height and project it from the breakout point to estimate the target move.

Bitcoin and gold have surged this year. The precious metal's price has increased 38% year-to-date, hitting an all-time high of \$3,530 per ounce Wednesday, according to Trading Economics. Bitcoin's price has increased 20% to \$112,000 over the same period, according to crypto data provider CoinGecko.

For analyst Alex Wacy, gold's pullback is similar to its 2020 peak that coincided with a local Bitcoin bottom. The question now is whether gold will once again mark the bullish reversal for BTC.
