Leverage fingerprints: Funding, OI and liquidation cascades

The earlier plan positioned the token as significantly underpriced relative to its fundamentals.

"Bitcoin briefly tested record highs before retreating as traders took profits," Joe DiPasquale, CEO of crypto asset manager BitBull Capital, told Decrypt. "The broader setup remains bullish, with a prolonged government shutdown likely to continue driving interest in hard assets and supporting demand for Bitcoin as an alternative store of value."

The relative strength index is still below the 50 mark, suggesting that market conditions still favor the downside.

Blockchain finance is reshaping the traditional financial ecosystem. Through blockchain technology, financial services can achieve decentralization and disintermediation, reduce transaction costs, and improve efficiency. Currently, the main applications of blockchain finance include cross-border payments, digital currencies, decentralized exchanges (DEXs), lending platforms, etc. Compared with traditional finance, blockchain finance has higher transparency and lower entry barriers, providing new possibilities for the development of inclusive finance. However, the development of blockchain finance also faces challenges such as regulatory uncertainty and technical risks, requiring a balance between innovation and regulation.
