Comprehensive Guide to binance api transaction history

At the start of the year, there were about \$205 billion worth of stablecoins in circulation, according to data aggregator DeFi Llama. Within the past week, the total market cap for stablecoins has surpassed \$302 billion. That kind of rapid growth will need to accelerate in the coming years to fulfill Standard Chartered's projections.

He warned against loosening traditional corporate rules for crypto treasuries, noting they protect against "volatility arbitrage shells disguised as leveraged Bitcoin plays" that led to the recent retail losses.

"At this point, it's too early to tell whether the demand for HPC will meet lofty expectations," he wrote. "We remain focused on infrastructure that keeps bitcoin mining competitive, helping clients secure power-ready sites, interconnection, and long-duration energy, with the flexibility to repurpose assets for HPC if and when demand matures."

Treasury and corporate holdings

If US equities sustain their recovery heading into earnings season, it could create favorable conditions for Bitcoin's own upside revival. A renewed rally in tech and growth stocks, bolstered by easier monetary policy, might help extend "Uptober" optimism into a stronger finish for the month.

The deal arrives as the crypto industry witnesses "a powerful convergence between digital assets and traditional financial markets," Raghu Yarlagadda, CEO of FalconX, wrote in a statement shared with Decrypt.
