Together, they account for about a quarter of the country's \$4.3 trillion (US\$2.8 trillion) superannuation pool, according to data released by the Australian Prudential Regulation Authority last week.

Cross-border payment is one of the important application scenarios of blockchain technology. The traditional cross-border payment process is complex, involving multiple intermediaries, with long settlement time and high fees. In contrast, cross-border payments based on blockchain technology can realize direct peer-to-peer transactions, greatly simplifying the process, shortening settlement time, and reducing costs. Currently, several countries and financial institutions

have begun to try using blockchain technology for cross-border payments. With the continuous maturity of technology and the improvement of regulatory frameworks, blockchain cross-border payments are expected to become the mainstream cross-border payment method in the future.

The film uses the human angle to frame a debate that was prevalent at the time. When an attacker takes money from a smart contract, relying on the contract's internal logic to obtain tokens outside of the creator's intention, is that wrong? Should the attacker be censured, legally or otherwise, or is this simply fair play?

The S&P; Regional Banks Select Industry Index recovered part of Thursday's losses, trading 1.5% higher on Friday.
