The guild also warned producers that they “may not use synthetic performers without complying with our contractual obligations, which require notice and bargaining whenever a synthetic performer is going to be used.”

“We have seen crypto firms react positively to our financial promotions rules and regulations; however, where we still see poor practices, we will not hesitate to take action where firms appear to be breaching our rules.”

A Uniswap engineer said the team did not specifically build the integration for Solana, but rather designed “architect layers” that were platform-agnostic.

If the price breaks above resistance while funding spikes and OI balloons, treat the breakout as suspect until the level is retested and holds. After the initial pop, healthy signs include funding cooling off and OI rebuilding on the retest. If, instead, open interest unwinds and price slips back below the level, the breakout likely failed.

With Bitcoin setting a then-record price of \$67,000 in November 2021 before declining in the months thereafter, that should mean that the cycle is soon coming to an end. And some traders may be betting on that outcome.

“This is a first step in bringing the spirit of Dogecoin directly into the fabric of the world’s game,” he added.
