Comprehensive Guide to binance borrow

Polymarket recently reclaimed market leadership from Kalshi after trailing for eight weeks, posting \$1 billion in weekly volume against Kalshi's \$950 million.

The technique, called “EtherHiding,” emerged in 2023 and is typically used in conjunction with social engineering techniques, such as reaching out to victims with fake employment offers and high-profile interviews, directing users to malicious websites or links, according to Google.

Defiance and other firms already offer a number two times leveraged ETFs that are geared toward short-term investors, asking them to speculate on the one-day direction of certain stocks, many of them in the technology sector.

But here's where things get interesting: BNB has been riding a powerful parabolic support line since mid-year. The chart shows a clear parabolic advance—the kind that can deliver explosive gains but also tends to end with equally explosive corrections. Looking at the projection, if this trajectory continues uninterrupted, BNB could be trading near \$2,000 by December 31, potentially delivering another 67% gain from current levels over the next 89 days.

Cointelegraph reached out to Paradigm for comment, but did not hear back by the time of writing.
