Community split on future of corporate blockchains

Bitcoin's price recently stood at \$108,200, down nearly 3% over the past day, according to crypto markets data provider CoinGecko. BTC hit a new high of \$126,080 at the start of the month before tumbling last week as investors liquidated over \$19 billion in crypto futures positions liquidated.

By Monday, Bitcoin rebounded to around \$115,000, almost erasing the weekend losses. Hougan said the rapid recovery indicates the strength of blockchain infrastructure. "The damage was contained to individual investors," he added, noting that no major institutions collapsed during the event.

Prosecutors also revealed that the U.S. government has seized more than \$14 billion worth of BTC from Prince Holding, and is currently pursuing the largest forfeiture action in DOJ history.

In the U.S., the GENIUS Act tried to mitigate the risk stablecoins could pose to banks by blocking issuers from offering yield. But that hasn't stopped other companies from creating incentives for stablecoin holders.

“Further steps” ahead
