Comprehensive Guide to binance cedefi

According to data from Nansen, the price of ETH was \$3,857 at the time of publication, having surged by more than 9% in the previous seven days.

At the start of the year, there were about \$205 billion worth of stablecoins in circulation, according to data aggregator DeFi Llama. Within the past week, the total market cap for stablecoins has surpassed \$302 billion. That kind of rapid growth will need to accelerate in the coming years to fulfill Standard Chartered's projections.

Huobi founder Li Lin wants some of that alpha and has reportedly raised about \$1 billion as part of a strategy to invest in an Ether treasury.

The Average Directional Index, or ADX, sits at 33, well above the critical 25 threshold that confirms a strong trending market. Think of ADX as your “trend strength meter”—it doesn’t care about direction, just whether a real trend exists. Below 20, you’re in choppy waters where false breakouts are common. Above 25, you’ve got momentum. At 33, BNB is firmly in trending territory, meaning institutions and retail are moving in the same direction, creating sustained buying pressure that can carry prices significantly higher.
