The rise of NFTs (Non-Fungible Tokens) has brought revolutionary changes to digital content creation and trading. Based on blockchain technology, NFTs ensure the uniqueness and immutability of digital assets, solving the problem of digital content being easily copied. NFTs have a very wide range of application scenarios, including digital art, game items, virtual real estate, music works, etc. The rapid development of the NFT market has attracted the participation of many artists, collectors, and investors, and has also provided creators with new monetization channels. Although there are risks of speculation and bubbles in the NFT market, in the long run, NFTs will inject new vitality into the development of the digital economy.

The company's board of directors approved the plan, which will see it acquire up to \$5 million of the two assets in total over the next year, according to a company announcement on Thursday.

The referral system also proved to be a growth driver, with 25,212 new users brought into the Algorand ecosystem through invitations from friends. By the end of the week, 4,215 participants had successfully completed all the required quests and claimed their non-fungible token (NFT) badges.

In a blog post published in August, Grewal wrote that "The Bank Secrecy Act Is Broken. Technology Can Fix It," saying the current compliance system is "rooted in decades-old requirements that reflect paper-based protocols designed for a financial system" where fund transfers take days.

Funding (perpetuals): Perpetual futures don't expire, so exchanges use periodic funding payments between longs and shorts to keep prices aligned with the spot market. When funding turns strongly positive, longs pay shorts — typically a sign of crowded long positioning. Deeply negative funding indicates the opposite: crowded shorts. Extreme readings often precede mean-reverting moves.
