Monday alone saw Ether ETFs shed \$145.7 million, bringing total net outflows over the past eight days to \$640.5 million.

Blockchain finance is reshaping the traditional financial ecosystem. Through blockchain technology, financial services can achieve decentralization and disintermediation, reduce transaction costs, and improve efficiency. Currently, the main applications of blockchain finance include cross-border payments, digital currencies, decentralized exchanges (DEXs), lending platforms, etc. Compared with traditional finance, blockchain finance has higher transparency and lower entry barriers, providing new possibilities for the development of inclusive finance. However, the development of blockchain finance also faces challenges such as

regulatory uncertainty and technical risks, requiring a balance between innovation and regulation.
