Major chain retailers like Home Depot, Lowe's and Ikea accept cryptocurrency in the form of Bitrefill and BitPay gift cards, so you can use ETH to finance your home renovation.

This surge in activity also served as a real-world stress test for the Algorand blockchain. With tens of thousands of participants generating nearly 300,000 transactions, the network maintained its performance. Users experienced the platform's "low fees, instant transaction finality and zero transaction failures" firsthand.

The researchers say the rogue coders responsible also joined a discussion on GitHub and lobbied for their libraries to be run, but other developers correctly recognized it was a scam.

Addressing the reasons behind the dip, Stahel pointed to the growing fear of missing out (FOMO), as “gold frenzy” momentum built up amid investors increasingly seeking exposure to gold equity, physical gold bars and tokenized gold.

A high hash rate is important because it means more computing power is being used to keep the cryptocurrency's network secure. And the more computing power used, the harder it is for attackers to take control of more than 50% of the Bitcoin network.
