How to read: A decline in volume on the right shoulder signals weakening momentum. A price break below the neckline confirms a bearish reversal, while a break above it confirms a bullish inverse. Measure the distance from the head to the neckline, then project that distance from the breakout point to estimate the target move.

This update allows anyone who staked 500,000 HYPE tokens, about \$20 million, to deploy their own perp swap contract with independent margining, orderbooks and parameters.
