Open banking, which allows consumers to share financial data with third-party apps through APIs, serves as a key link between traditional finance and sectors like decentralized finance (DeFi), crypto payment networks and digital banking platforms.

Grayscale's staking-enabled ETPs have had a significant impact on Wall Street and the broader crypto ecosystem. It connects blockchain-based yield with regulated financial products, turning crypto ETPs from simple price trackers into income-generating assets. The initiative marks a key advance in institutional adoption. Regulated staking on Ethereum and Solana could draw substantial new

capital to these networks while acting as a model for products linked to other PoS blockchains or tokenized assets.

Crypto price charts visually represent price movements across different timeframes, providing insights into trends, volatility and trading opportunities. In a fast-paced crypto market, open-high-low-close (OHLC) data enables investors to track price changes within specific periods, forming the core of technical analysis.

Bitcoin, which has long been criticized for volatility as one of the key arguments against being a legitimate store of value, has also slipped 5.2% from its intra-day high of \$114,000, though daily losses were about 0.8% at the time of writing, according to Coinbase data.

"We recently contracted for additional power and real estate in College Park to deliver high-value compute to the greater Atlanta metro area and are evaluating giga-campus opportunities across the portfolio and pipeline that are well positioned to satisfy significant off-taker demand."

He pointed out that Polygon could easily "pick up off the shelf a ZK tech stack" that will enable a proof system, adding that the technology has "gotten quite good" with proving costs now as cheap as \$0.0001 per transaction.
