WBTC requires trust because the Bitcoin backing it is held by a centralized custodian who must be trusted not to lose, freeze, or misuse the funds. Users depend on this custodian's honesty and solvency rather than cryptographic guarantees. This is the primary issue addressed by Babylon's trustless implementation.

binance delisting announcement

According to a Bloomberg report on Friday, Li has partnered with Fenbushi Capital co-founder Shen Bo, HashKey Group CEO Xiao Feng, and Meitu founder Cai Wensheng to launch an Ether accumulation strategy through a Nasdaq-listed shell company. The project raised \$1 billion, which included \$500 million from HongShan Capital Group and \$200 million from Avenir.

Thus, other on-chain analysts have recently floated the idea that the \$14 billion worth of BTC that disappeared in 2020 was potentially never stolen at all; or, alternatively, that the heist was pulled off by the U.S. government, or hackers working for the government.

The introduction of Google's AI summaries has raised huge red flags for web publishers, however, as users are less likely to visit their sites if the information is extracted and provided up front. The issue is compounded by AI's tendency to hallucinate, and even provide dangerous answers based on flawed sources.
