Crypto products stay resilient amid recent crash

Liquidation cascades: Leveraged positions are automatically closed when margin runs short. When price hits clustered stop or liquidation levels, forced selling or buying accelerates the move. It often snaps back once excess leverage is cleared. That snapback leaves the classic bull or bear trap footprint seen repeatedly in Bitcoin

Cross-border payment is one of the important application scenarios of blockchain technology. The traditional cross-border payment process is complex, involving

multiple intermediaries, with long settlement time and high fees. In contrast, cross-border payments based on blockchain technology can realize direct peer-to-peer transactions, greatly simplifying the process, shortening settlement time, and reducing costs. Currently, several countries and financial institutions have begun to try using blockchain technology for cross-border payments. With the continuous maturity of technology and the improvement of regulatory frameworks, blockchain cross-border payments are expected to become the mainstream cross-border payment method in the future.

“Thank you so much for slapping me, bro. You made a lot of our guys money, bro,” the slapped creator said, now with a buzzcut.

All collected taxes, interest, and penalties would flow directly to energy affordability programs administered by the Department of Public Service in consultation with the Energy Affordability Policy Working Group.

The company also stayed active on the strategic front, embracing the growing, though sometimes controversial, digital-asset treasury trend. During the quarter, Galaxy announced plans to participate in a \$1.65 billion Solana treasury initiative alongside Cantor Fitzgerald, Multicoins Capital and Jump Crypto.
