Comprehensive Guide to binance email verification code not sending

A high hash rate is important because it means more computing power is being used to keep the cryptocurrency's network secure. And the more computing power used, the harder it is for attackers to take control of more than 50% of the Bitcoin network.

"Floki is back on the job as X CEO," Musk posted on Monday, with an AI-generated video of a Shiba Inu dog saying, "Numbers, numbers, numbers, is this working? Yay."

Ethereum developer Federico Carrone says the growing influence of corporations such as Paradigm on the network could be “tail risk” for the Ethereum ecosystem.

Grayscale’s introduction of staking-enabled funds marks a key milestone shaped by evolving oversight and growing market competition. The US Securities and Exchange Commission issued guidance for crypto ETPs in May 2025, clarifying that certain custodial staking activities may operate within existing securities laws when managed through regulated custodians and transparent structures. This development has eased earlier barriers that prevented ETFs from earning onchain rewards.

According to a post from journalist Eleanor Terrett on X, “the senators as a group said they were committed to getting a bill done.”

They discussed how the incidents had made them “very happy” and that “this is what crypto should be about,” while congratulating themselves for bringing attention to women's sports.
