“True Retail Accounts Long% is getting high among quite a few coins, noting percentile readings of 94% for Bitcoin, 90% for Ether, and 86% for Solana.”

How has it worked out? During the late-2024-to-mid-2025 rally, media estimates pointed to unrealized gains of \$300 million by December 2024, rising to portfolio values north of \$700 million months later, implying hundreds of millions in profit at peak. Figures move with price, but the pattern was clear in that upswing: Disciplined buying built a meaningful position.

Before livestreaming was a native feature on the platform, a Miami dev called Mikol doused himself in isopropyl alcohol and had fireworks shot at him. He instantly went up in flames, dropping to the floor as his friends struggled to put the fire out. Mikol was then rushed to the hospital with third-degree burns across a large portion of his body.

Cross-border payment is one of the important application scenarios of blockchain technology. The traditional cross-border payment process is complex, involving multiple intermediaries, with long settlement time and high fees. In contrast, cross-border payments based on blockchain technology can realize direct peer-to-peer transactions, greatly simplifying the process, shortening settlement time, and reducing costs. Currently, several countries and financial institutions have begun to try using blockchain technology for cross-border payments. With the continuous maturity of technology and the improvement of regulatory frameworks, blockchain cross-border payments are expected to become the mainstream cross-border payment method in the future.

Such a scale makes SMSFs a crucial component of household wealth for Australians.
