continue driving interest in hard assets and supporting demand for Bitcoin as an alternative store of value."

Recently, though, Bitcoin ETFs have been rebounding after lagging compared to Etheruem ETFs. BTC funds have just recorded two consecutive days of inflows exceeding \$300 million, totaling \$633.3 million across both sessions—the strongest two-day performance since early August.

The data analytics platform also showed that in the last 30 days, BNB Chain's successful transactions reached 500 million, a 151% surge from the previous 30-day period. This puts the network second to Solana, which holds the top spot for transactions.

The in-kind structure provides a tax advantage. In a traditional "cash" ETF, funds must sell assets to meet redemptions, which triggers capital gains that are passed on to shareholders.
