Comprehensive Guide to binance futures python

Trading volumes jumped 140% from the previous quarter, fueled by increased spot and derivatives volumes. The quarter included the execution of a major client transaction involving the sale of more than 80,000 Bitcoin (BTC) — one of the largest crypto trades to date.

The Bank Policy Institute and Kentucky Bankers Association filed a lawsuit the same day the rule was finalized, saying it mandates data sharing without proper oversight of third parties, increases fraud risk by allowing unsafe practices like screen scraping, and forces banks to provide free access to systems they've spent billions securing.

In fact, even with such a sharp correction, the overall trend could still be considered long-term bullish, with prices still trading above the 50-day EMA.

Part of this growth is being driven by improvements in underlying blockchain infrastructure, with some networks now processing over 3,400 transactions per second, a more than 100-fold increase in throughput over the past five years.

Why crypto investors use DCA

"The elephant in the room is are DATs really justified?" Chu questioned, noting "without a credible business case, rigorous governance, robust custody, and transparent risk controls, such DAT structures can become misaligned with shareholder interests and could invite the kind of liquidity and governance risks regulators worry about."
