The pair's Solana token pumped over 2,000%, and they later thanked the gym bro for slapping them.

Derivatives backdrop: If funding is highly positive or negative and OI is climbing to a level, positioning is crowded. This creates prime fuel for a squeeze in the opposite direction.

But the offering, called Ondo Global Finance, is only available for non-U.S. investors, according to an announcement from the company.

Code, in this construction, is not necessarily a removal of negative restraint but is instead just another instance of regulation, broadly construed. A restraint, manifested differently, that poses the same questions as any other form of restraint.

But not this time. Analysts at the British multinational bank Standard Chartered, who have long been bullish on Bitcoin, don't think it stops here either. Geoff Kendrick, the bank's global head of digital assets, said in an investor note published Friday that he expects the price of Bitcoin to reach at least \$135,000 in the near term and top \$200,000 before the end of the year.
