Why these three? Each has strong brand recognition, decent liquidity and different strengths: BTC as the store-of-value, ETH with its smart contract ecosystem and XRP with fast settlement and cross-border payments. Together, they cover what

businesses need: trust, functionality and speed.

The stated objective for the models is to maximize their risk-adjusted returns. The rules emphasize autonomy, requiring each AI to independently generate its trading ideas, size and time its trades, and manage its own risk, with all model outputs and corresponding trades made public for transparency.

An asset manager known for exchange-traded funds geared toward risk-embracing investors wants to ratchet up the possibilities for these thrill-seekers, filing an application for 49 funds offering three times long and short leveraged exposure to tech and crypto-focused firms, gold, and ETFs that individually track the price of Bitcoin, Ethereum and Solana, among other assets.
