Comprehensive Guide to binance get historical data

The historical drag of September's bearish seasonality, meanwhile, is forcing U.S. investors to reassess their positions ahead, as they look toward the end of the financial year on September 30.

The price of gold has surged 64% since Jan. 1 as investors flock to the store of value asset amid dollar debasement, geopolitical tensions, and trade tariff woes.

In general, both retail and institutional investors continue to focus on buying and holding tokens for price gains rather than staking them. Operating validator nodes requires substantial capital, technical know-how and uninterrupted uptime. It also exposes participants to risks such as slashing penalties and custody challenges. Additionally, in many jurisdictions, the regulatory treatment of staking rewards remains unclear.

At the time, FalconX stated that its FTX exposure did not affect client funds or any ongoing operations. The original link to the statement has since disappeared from its website.

“Evaluate how likely the current X-driven pump for [TICKER] is organic. Cross-reference recent GitHub commits, official releases, known vesting schedules and the largest onchain transfers in the past 72 hours. Provide a confidence score 0-10 and list five specific verification links.”
