Chen believes "a true altseason" may still be a few weeks away and awaits Bitcoin's consolidation to trigger a capital rotation of sidelined liquidity into high-conviction sectors like AI, DeFi, and layer-2s.

On Monday, NASA's acting chief, Sean Duffy, said that his agency will open the moon lander contract to other competitors beyond Elon Musk's SpaceX, which has experienced delays in its Starship lunar lander timeline.

The relative strength index is still below the 50 mark, suggesting that market conditions still favor the downside.

Chart patterns are shapes formed by price movements that help traders anticipate future market trends. These patterns fall into two main categories: reversal patterns, which signal that a current trend may change direction, and continuation patterns, which suggest the trend will likely resume after a brief pause. They stem from market psychology, where emotions like fear, greed and uncertainty drive collective trading behavior and create recognizable shapes on charts.

Digital wallets are essential tools for entering the blockchain world. They are not only used to store cryptocurrencies but also to manage users' digital identities and interact with DApps. According to different storage methods, digital wallets can be divided into hardware wallets, software wallets, and paper wallets. Among them, hardware wallets have the highest security but are less convenient to use; software wallets (including desktop wallets, mobile wallets, and web wallets) are convenient to use but have relatively lower security. Choosing a suitable digital wallet requires balancing security and convenience according to individual needs and asset scale.
