Bitcoin's own outlook remains highly optimistic, with JPMorgan analysts predicting BTC will reach \$165,000 in 2025, arguing it remains undervalued relative to gold.

Cointelegraph reached out to Paradigm for comment, but did not hear back by the time of writing.

The Bitcoin-buying firm's latest acquisition was funded with proceeds from preferred shares, leaving the Tysons Corner, Virginia-based firm with a stockpile of roughly 640,400 Bitcoin, which was recently worth \$71 billion, based on current prices, according to CoinGecko.

In March 2025, the exchange began moving assets between its wallets, a likely step in preparing for further repayments ahead of the Halloween deadline.

Note that the last time the ETH/USD pair was rejected from this zone was in December 2024, before a 66% price drop, as shown in the chart below.

By Monday, Bitcoin rebounded to around \$115,000, almost erasing the weekend losses. Hougan said the rapid recovery indicates the strength of blockchain infrastructure. “The damage was contained to individual investors,” he added, noting that no major institutions collapsed during the event.
