A contested framework

Prediction market gurus have plenty on their plate this week, between NFL kickoff and forecasting the next crypto market moves after recent all-time highs.

In the past week, though, Metaplanet has faced headwinds. On Monday, the company's shareholders approved an \$884 million capital raising proposal, although the firm's stock dropped 60% since mid-June.

Elon Musk's aerospace company SpaceX moved \$257 million worth of Bitcoin, its second large-scale transfer in three months, prompting speculation about a potential sale as the company faces mounting financial and political pressure.

The critical question for investors is whether this Bitcoin-centric rally marks the end of the much-anticipated "altcoin season or alt season," a period during which altcoins dramatically outperform.

Back in 2023, when Musk stepped down as CEO of then-Twitter, he jokingly posted that Floki was the new CEO of the company, following the tweet with a series of other posts about Floki. It prompted a 146% spike in Floki's market cap to \$557 million, according to CoinGecko.
