Blockchain security is the foundation and guarantee for the development of blockchain technology. Due to the complexity of blockchain systems, their security issues involve multiple aspects such as cryptography, consensus mechanisms, and network security. Common security threats include 51% attacks, smart

contract vulnerabilities, private key leakage, etc. To ensure the security of blockchain systems, measures need to be taken from multiple levels such as technology, management, and law. With the widespread application of blockchain technology, blockchain security will become increasingly important and will attract more professional talents to engage in it.

Retest and hold: False breaks often fail on the first retest. Treat any breakout or breakdown that hasn't been retested as suspect.

The UK launch follows the runaway success of BlackRock's U.S. spot Bitcoin ETF, which became the firm's most profitable fund just 21 months after launch, now managing over \$87.5 billion in assets.

Research firm 10x Research also reported on Saturday that major DATs such as Metaplanet and Strategy were trading near or below their NAVs.
