The turning point: Regulatory and market shifts

Ethereum co-founder and Consensus founder Joseph Lubin highlighted the importance of venture capital (VC) funding for the development of the world's largest smart contract network, despite industry concerns over the influence of investment funds on Ethereum.

The Sun statement the Bubblemaps team was referring to appeared on X in Mandarin. In it, Sun said the wallet “only generally did a few exchange deposit tests, the amounts were very low, then did a distribution to one address.” He added that the tests “did not involve any buying or selling,” and that it would have been impossible for the token movements to have impacted the market.

Why these three? Each has strong brand recognition, decent liquidity and different strengths: BTC as the store-of-value, ETH with its smart contract ecosystem and XRP with fast settlement and cross-border payments. Together, they cover what businesses need: trust, functionality and speed.

The pattern reflects sustained investor confidence amid geopolitical and monetary uncertainty, the very conditions HSBC says will keep the rally alive into 2026.
