They would not provide certain benefits, though, including payments of interest on account balances or overdraft privileges. They might also impose caps on balances, in a bid to control for “various risks to the Federal Reserve and the payment system.”

Grayscale has played a central role in the institutionalization of crypto. Founded in 2013, it has grown into one of the world’s largest digital asset investment platforms, managing over \$35 billion in assets. It has now launched staking-enabled products that bring blockchain yield mechanics into Wall Street’s traditional framework.

He believes this outlook bodes well for a sustained rally through the year's end, noting that “historically, October through December are the most active and bullish months for Bitcoin.”

Miners have often had to sell coins or branch into different industries—like high-performance computing for artificial intelligence—to cover operational costs.

Grayscale’s introduction of staking-enabled funds marks a key milestone shaped by evolving oversight and growing market competition. The US Securities and Exchange Commission issued guidance for crypto ETPs in May 2025, clarifying that certain custodial staking activities may operate within existing securities laws when managed through regulated custodians and transparent structures. This development has eased earlier barriers that prevented ETFs from earning onchain rewards.
