“Ondo’s launch of Global Markets is impactful because it delivers on tokenization where many earlier efforts fell short,” Jamie Elkaleh, chief marketing officer at Bitget Wallet, told Decrypt. “The platform brings more than 100 U.S. stocks and ETFs onchain, the widest asset range by far held by U.S.-registered broker-dealers, and enables 24/7 trading.” This combination of regulated backing and seamless blockchain access addresses the regulatory, liquidity, and interoperability hurdles that limited previous attempts at tokenized securities.”

Still, compared to past cycles, BTC's price hasn't soared as much post its quadrennial halving: as the market cap of the biggest coin grows, it takes far more

Miller attempted to reconcile this apparent contradiction, saying "investing in a business that's working with Bitcoin transactions is a very different game than direct investment in buying Bitcoin."

ETFs saw a similar pattern, logging \$145.68 million in daily net outflows, their third straight session of red. BlackRock's ETHA saw the largest single-day withdrawal of \$117.86 million, followed by Fidelity's FETH, which lost \$27.82 million.
