## Comprehensive Guide to binance next coin listing

The Crypto Fear & Greed Index. Source: Alternative.me

Ethereum's bearish positioning is evident in Deribit's data, which shows "a large increase in open interest of puts since the end of August," Andrew Melville, head of research at crypto derivatives analytics platform Block Scholes, told Decrypt.

This technological progress has fueled the continued adoption of stablecoins, fiat-pegged digital tokens that can move across the internet without relying on traditional payment rails. The report cited \$9 trillion in stablecoin transactions over the past 12 months — an 87% increase from the previous year.

Although \$1 trillion is a large number, the Standard Chartered analysts pointed out that it represents "just 2% of aggregate deposits in our 'high-vulnerability' countries."

"If banks had the ability to filter third parties, they could block data sharing with crypto exchanges, which would hinder fiat-to-crypto conversions," Kadan Stadelmann, Chief Technology Officer at Komodo Platform, told Decrypt. It would also devastate stablecoin markets by hampering their liquidity."

Derivatives backdrop: If funding is highly positive or negative and OI is climbing to a level, positioning is crowded. This creates prime fuel for a squeeze in the opposite direction.
