With the rise of AI, charts that integrate onchain data, such as wallet activity and total value locked (TVL), are becoming increasingly popular. These advanced charts give traders deeper insights into evolving market dynamics.

The milestone is expected to redefine the protocol's economic and technical architecture, introducing a modular "hub and spoke" design.

The National Hockey League has inked multi-year licensing agreements with prediction market startups Kalshi and Polymarket, marking the first time a major U.S. professional sports league has authorized these platforms to use its trademarks.

"The elephant in the room is are DATs really justified?" Chu questioned, noting "without a credible business case, rigorous governance, robust custody, and transparent risk controls, such DAT structures can become misaligned with shareholder interests and could invite the kind of liquidity and governance risks regulators worry about."

Still not ready for primetime
