Both platforms have capitalized on loosening federal oversight as Kalshi and Polymarket secured CFTC no-action letters this year, clearing them to operate without immediate federal enforcement risks.

Meanwhile, an X user under the handle Boluson argued that most corporations don't need a blockchain; they are just feeling pressured to adopt the technology

over fears of being left behind.

A sufficiently powerful quantum computer could crack the encryption algorithms that underpin cryptocurrencies, and are also used to secure sensitive information in banking, medical and military applications. Encryption is the core component that makes digital assets and peer-to-peer finance possible.

The first, as is highlighted in Craig's film, is that it is incredibly difficult to build code that is robust enough to regulate human behavior in the range of circumstances it is likely to encounter. This issue comes from a mismatch between the rigid logical nature of code and the fluidity of human behavior.
