In response to Nailwal's post, Buterin acknowledged Polygon's contributions to Ethereum, noting that it hosts the largest predictions market platform in Polymarket and has advanced zk-EVM technology, among other things.

The uptick, however, occurs amid flat cumulative volume deltas, with a noticeable increase in passive bids at a 10% order book depth, according to CoinGlass data.

"If you want to say that cryptocurrency is this shining horse, 'an angel from on high,' you're bullshitting," he said. "You have this permissionless open platform that has a lot of different things going on that most people do not understand."

A sufficiently powerful quantum computer could crack the encryption algorithms that underpin cryptocurrencies, and are also used to secure sensitive information in banking, medical and military applications. Encryption is the core component that makes digital assets and peer-to-peer finance possible.

American sports betting platform DraftKings is tapping Polymarket as the clearinghouse for its new prediction market, an industry that clocks over \$4 billion in monthly trading volume.

The increases come, despite miners ongoing struggles with rising energy costs and lower rewards. After last year's halving, the payoff for miners has fallen to 3.125 bitcoin, down from 6.250 previously.
