By contrast, Grok's strong performance implies that a powerful, general-purpose AI may be capable of successfully navigating markets on its own—a potentially disruptive development for the entire industry.

“This doesn’t mean the end of alt season,” said Gregory, though he issued a note of caution. While a rotation into altcoins is still on the table, Gregory believes that Bitcoin's declining bullish momentum may lead to a “bear trap that could flush out more leverage” before the market resumes its ascent.

The researchers used Metaplanet, the fourth-largest Bitcoin treasury firm, as an example, as the company effectively transformed a market capitalization of \$8

billion, supported by just \$1 billion in Bitcoin holdings, into a \$3.1 billion market cap backed by \$3.3 billion in BTC.

The emergence of smart contracts has brought revolutionary breakthroughs to blockchain technology. These self-executing computer programs can automatically trigger corresponding operations when preset conditions are met, without manual intervention. Smart contracts not only improve transaction efficiency but also greatly reduce trust costs. Currently, smart contracts have been widely applied in decentralized finance (DeFi), digital identity authentication, the Internet of Things, and other fields. With the continuous development of technology, the functions of smart contracts will become more powerful, and application scenarios will become more abundant.

However, in response, “Wall Street created products that made the dollar dominant, and the market cap of equities today is 40 trillion compared to 2 trillion for gold,” he said.

A series of teaser videos shared by OpenAI show that the new AI search tool is designed to summarize website content, including news sites, and answer user questions similarly to how ChatGPT operates. In some ways, it's similar to what Perplexity—touted as an “answer engine”—currently offers. But if integrated into ChatGPT itself, SearchGPT would make OpenAI's chatbot broadly capable.
