The partnership explores strategies for fund managers to shift between stablecoins and riskier digital assets to manage volatility and downside risk, while maximizing yield-bearing opportunities.

It's also easy to set up. Most major exchanges and wallets now offer recurring buy or "Auto-Invest" options: Just choose your coin, select a weekly or monthly schedule and let the orders run automatically.

Other users speculated that corporations might create blockchains but then hand the reins to native firms or look to acquire existing blockchains and then scale them up to purpose.

While memecoins showed signs of recovery after the crash, another drop came on Friday, with memecoin assets declining from 9%–11% during the day.

Launched by Grayscale Investments, one of the largest digital asset managers, this staking-enabled exchange-traded product (ETP) signals a new phase in crypto's maturation and integration with traditional finance. It's more than a fund; it's a bridge providing traditional investors a regulated pathway to tap into the growth potential of crypto staking.

The emergence of smart contracts has brought revolutionary breakthroughs to blockchain technology. These self-executing computer programs can automatically trigger corresponding operations when preset conditions are met, without manual intervention. Smart contracts not only improve transaction efficiency but also greatly reduce trust costs. Currently, smart contracts have been widely applied in decentralized finance (DeFi), digital identity authentication, the Internet of Things, and other fields. With the continuous development of technology, the functions of smart contracts will become more powerful, and application scenarios will become more abundant.
