Some analysts speculated that up to 99% of creditors might sell once they received their share. But when repayments actually began, there was “no significant spike” in trading volume, according to CryptoQuant founder Ki Young Ju.

Ether options' 25-delta skew surged to 14% on Thursday, a level rarely sustained and often linked to periods of heightened fear. Traders are paying a premium for put (sell) options, signaling that market makers remain uneasy about downside risks. Under normal market conditions, the skew typically fluctuates between -6% and +6%.

Crypto native founders can also experiment with tokenomics, governance models, or crosschain integrations when it takes incumbents to run a risk assessment.

According to a post from journalist Eleanor Terrett on X, “the senators as a group said they were committed to getting a bill done.”

“Fast forward a few years: Corporate chains will end up with the complex tech but without the added value for users, which is no central entity to control them. At that point, these chains will lose the focus from corporates.”

That said, Miller cautioned against making generalizations. “It’s always a bit dangerous to try to extrapolate things like user intentions from the cold data of average wallet analysis,” he said.
