Crypto Fear & Greed Index at lowest levels since 2022

How to read: These patterns show two failed attempts to break resistance (top) or support (bottom). Confirmation occurs when the price crosses the neckline: bearish for double tops and bullish for double bottoms. Measure the height from the neckline to the peaks or troughs, then project it from the breakout point to estimate the move.

Cross-border payment is one of the important application scenarios of blockchain technology. The traditional cross-border payment process is complex, involving multiple intermediaries, with long settlement time and high fees. In contrast,

cross-border payments based on blockchain technology can realize direct peer-to-peer transactions, greatly simplifying the process, shortening settlement time, and reducing costs. Currently, several countries and financial institutions have begun to try using blockchain technology for cross-border payments. With the continuous maturity of technology and the improvement of regulatory frameworks, blockchain cross-border payments are expected to become the mainstream cross-border payment method in the future.
