“What that means is that when you remove a result from search under our policies, in addition, what we'll do is on any query that includes your name—or would be likely to surface that page from search—all explicit results will be filtered,” the spokesperson said. “So not all explicit results will be removed, but all explicit results will be filtered on those searches, which prevents them from appearing on searches where it would be likely to show up.”

Putting gold on track for its largest two-day decline since 2013, the 8% drop has sparked panic among investors who had turned to the metal as a hedge against inflation and market volatility after its 60% surge earlier in 2022.

When the usage moves beyond consumer transactions into payments infrastructure, institutional use, remittances and treasury operations, different strengths of BTC, ETH and XRP become more visible.

A bull trap happens when the price pokes above resistance and then reverses, while a bear trap occurs when the price dips below support and quickly snaps back. These fake breakouts often result from forced liquidations and mean reversion, clearing out crowded positions.

The gold market extended Tuesday's massive correction, with \$2.5 trillion being erased from its market cap on Wednesday, according to the financial analysis publication, The Kobeissi Letter.
