Comprehensive Guide to binance revenues

For many crypto holders, the first real test is whether you can spend BTC, ETH or XRP like cash: a cup of coffee, a sandwich or groceries. XRP tends to lag behind BTC and ETH when it comes to everyday purchases: Fewer small shops accept XRP directly, as its strength usually shows in back-end or cross-border payments rather than point-of-sale in cafes.

Bitcoin's rise also comes as gold and U.S. stocks jump on hopes that the Federal Reserve will cut interest rates again this month. The central bank has been under pressure from President Donald Trump to lower the cost of borrowing this year.

Cross-referencing with fundamentals and development activity filters out short-term buzz that isn't backed by progress or transparency.

The immediate-term direction now hinges on Friday's upcoming Non-farm Payrolls report. A bullish jobs report would most likely just limit the "red September" damage, according to Dawson, rather than spark a major rally.

BNB opened today at \$1,090.97 and closed at \$1,157.05, marking a solid 6.06% daily gain after hitting a new all-time high. The intraday high of \$1,168.39 shows bulls are in complete control, with the token breaking through resistance levels like they're made of paper.

He added that ETF flows could be a strong predictor of whether Bitcoin manages to escape a Red September—even if it did just see a Red August. A month (or any other period time) is considered red if an asset ends at a lower price than it started.
