## Comprehensive Guide to binance sats

“If you messed with the monetary side of the rules-based global order, the US would send the military over and kick your head in. That is a big part of why Saddam was invaded, a big part of what Gaddafi was doing.”

Lately, however, that decision has moved from tactical to strategic. Beyond developers deciding between ecosystems, big companies are now building their blockchains from scratch. And when the companies doing it are Stripe, Coinbase or other giants with deep regulatory and distribution advantages, the L1 stops being a neutral playing field and starts looking like a moat.

He called the rejection "a missed opportunity to explore how Indian listed companies can responsibly innovate" with Bitcoin in ways that add long-term shareholder value.

Lee stated that many DATs are trading below their net asset value (NAV), or the worth of their underlying crypto holdings. "If that's not already a bubble burst... How would that bubble burst?" he told Fortune on Thursday.

With the rise of AI, charts that integrate onchain data, such as wallet activity and total value locked (TVL), are becoming increasingly popular. These advanced charts give traders deeper insights into evolving market dynamics.

Paradigm's Tempo blockchain is building a network with a curated set of validators, which will essentially be controlled by Stripe, marking a steep departure from Ethereum's decentralized, open-source ethos.
