Everyday crypto transactions: Coffee shops, restaurants, retailers

As gold's \$2.5 trillion dip surpasses Bitcoin's entire market cap of \$2.2 trillion, some commentators highlighted the magnitude of the correction in comparison to the crypto market.

"No one wants another chain," Joe Petrich, head of engineering at non-fungible token (NFT) platform Courtyard, said in response to Stripe CEO Patrick Collison's

Tempo announcement, adding that there is “no need for yet another chain.”

"In practical terms, this means HIVE is scaling production of Bitcoin much like a growth business scales output of a core product," he wrote. "Each incremental exahash increases daily production and revenue potential, while our HPC division provides a complementary revenue stream that grows with demand for compute power. "

In traditional markets, clearing and settlement are often invisible to end-users, but they're where the real leverage is. Tempo would give Stripe a chain purpose-built for predictable fees, deterministic settlement times, and merchant distribution that nobody else can match. This is 20 years of payment-processor muscle memory applied to crypto rails.
