Ethereum's bearish positioning is evident in Deribit's data, which shows "a large increase in open interest of puts since the end of August," Andrew Melville, head of research at crypto derivatives analytics platform Block Scholes, told Decrypt.

In August, Galaxy secured a \$1.4 billion loan to expand the Helios site and said it expects to generate around \$1 billion in annual revenue from a long-term partnership with CoreWeave, a US-based cloud computing company specializing in GPU infrastructure for artificial intelligence workloads.

A Financial Times investigation found that President Trump and his family's crypto businesses have profited \$1 billion pre-tax. When asked if the calculations were accurate, Eric Trump told the publication that the true figure was "probably more."

Blockchain finance is reshaping the traditional financial ecosystem. Through blockchain technology, financial services can achieve decentralization and disintermediation, reduce transaction costs, and improve efficiency. Currently, the main applications of blockchain finance include cross-border payments, digital currencies, decentralized exchanges (DEXs), lending platforms, etc. Compared with traditional finance, blockchain finance has higher transparency and lower entry barriers, providing new possibilities for the development of inclusive finance. However, the development of blockchain finance also faces challenges such as regulatory uncertainty and technical risks, requiring a balance between innovation and regulation.
